

TROTHERIUM

TROTHERIUM

Chariy Token

OVERVIEW

Trotherium is a Deflationary token based on blockchain technologies. Our team found the revolutionary way to make donations easy, fast and secure with the help of blockchain technology which allow investor to take active role to help vulnerable and disadvantaged people in the world.

We believe everyone deserves a second chance. There are many costs to what we do and support our clients through training, education, counselling and support.

Your support would make an incredible difference to our ability to offer a second chance to an individual, group or family.

TOKENOMIC

Original Supply 1,000,000,000,000,000 TRM

Trotherium works by taking a 12% fee on every transaction. That fee is broken up into 3 parts:

Charity - 2% of the transaction is sent directly to the charity wallet. To then be used for donations to various charity organizations such as “Binance Charity”.

Reflection - 5% of the transaction is distributed to every wallet that holds Trotherium on a percentage basis. The more Trotherium you hold the more you will receive!

LP Generation - 5% of the transaction fee collected in Trotherium is sold into BNB. That BNB is married up with the remaining 5% of

TROTHERIUM

Trotherium and deposited back into the PancakeSwap liquidity pool.

500T Token Burn each of the first 50 days, this presents a powerful and exponential burn mechanic to ensure both stability and growth of TRM over time.

TOKENOMIC SUMMARY

Initial Supply 1,000,000,000,000,000 TRM

Initial Burn 500,000,000,000,000 TRM

Tax Distributed to Liquidity 5%

Tax Distributed to Holders 5%

Tax Distributed to Charity 2%

VISION

As the team that creates charity-based product we advocate for transparent and secure transactions directly to a non-profit foundations. Blockchain technology was initially created to make fully safe transactions that couldn't be hacked in any way. This kind of technology must be implemented in charity platforms as the main way to send money to a non-profit organizations.

Donations to charity is the very important thing, but at the same time everybody wants to get something for things they give — we dealt with this problem with the help of blockchain technologies. Everyone who transacts their digital assets, they also directly participate in our charity program and will be rewarded with “Trotherium token” (TRM) that they can sell on any available exchange or store on BEP-20 wallet.
